

Reduce your Delivery Costs

SMRTR Proof of Delivery™

SMRTR Proof of Delivery streamlines the way you deliver goods to your customers by creating a paperless experience that automatically tracks, monitors, and initiates activities at the appropriate time in your delivery process.

Eco-friendly and socially conscious organizations care about eliminating waste as a competitive advantage. If your organization is still using paper-based bills of lading, manifests or devices that do not provide any interaction beyond a signature, then take a look at SMRTR. We help organizations significantly reduce costs, eliminate errors and ensure that every product delivered gets tracked and billed.

Over-delivery of goods, mishandling damaged items or returns are not only missed revenue opportunities but cost the organization money.

SMRTR creates visibility into each delivery with a centralized dashboard, geotracking, notifications and workflow routing. The result, additional goods can be invoiced immediately and damaged or missing items are resolved quickly, driving customer satisfaction.

Let us streamline your delivery process and create a delightful experience for your customers providing you with a distinct competitive advantage.

KEY CAPABILITIES

- Record delivered goods electronically using your mobile device
- Capture notes, signatures and photos to document the delivery
- Communicate delivery status with customers and your backoffice

- Initiate notifications and workflows based upon the status of a delivery
- Track the driver's location relative to your deliveries
- Share, store and retrieve delivery document

HOW IT WORKS

Deliveries are Prepared

Driver logs in and deliveries are downloaded to the device. The driver has access to each delivery on or offline.

Record and Exceptions

Driver drops off goods at each stop recording any damages, returns or extra product dropped. Photos are attached.

Mobile Approvals

The delivery is approved by signing electronically which unlocks the ability to submit your document.

Notification

The customer and backoffice are notified when the delivery is complete and receive a copy of the signed delivery document.

Workflow

The status of the delivery initiates a workflow if action is required.

Dashboard

Monitor the status or your deliveries, geolocation of your drivers and access delivery documents all from a central dashboard.

Intuitive interface that can be customized to your needs

GROW REVENUE

Never miss billing additional goods left behind

REDUCE COST

Eliminate billing errors and customer disputes

INCREASE CUSTOMER SATISFACTION

Notify customers and resolve issues quickly

MANAGE CENTRALLY

All deliveries are tracked from a single dashboard and documents are stored centrally
