SMRTR CMS

AN INFORMATION MANAGEMENT SOLUTION

Designed to streamline and transform the way you do business by electronically collecting new information, sharing content, automating distribution, workflows and delivering insights to help you make better decisions.

WHAT IT DOES

Harness The Value of Your Content

SMRTR CMS™ is an affordable Content Management Solution that allows you to capture, search and retrieve any type of content from any source across the enterprise. It streamlines your business processes by connecting to existing network folders and systems; eliminating the need to migrate content to a central repository.

Our document management capabilities enable you to organize, manage, and share essential content regardless of where it resides in your organization. It provides authorized users and workgroups with the most up-to-date information needed to support key business processes and serve customers when and where they need it.

Empower your Users

SMRTR CMS allows you to work digitally with business content regardless of format. Digital folders keep content organized and easily accessible. Markups and notes support collaboration and file sharing. Facilitate coordination with external users providing a self-service portal for all customer and vendor documents. The solution also provides a complete audit trail of all actions for compliance and analytics.

Improve Your Processes and Workflows

Our robust solution has a browser-based interface that grants authorized users access to important business documents quickly and efficiently. Once viewed, content can be easily distributed via email, fax, FTP and print — all in your desired format. From easy downloading, to file sharing, document annotation and mass distribution, SMRTR includes the features you need to improve your processes and workflows.

SMRTR CMS provides Integrated Document

Management for IBMi, Windows, Linux, and Unix and in the Cloud. With SMRTR CMS you can significantly increase your responsiveness to customers, meet your service level agreements (SLAs), gain a competitive advantage, and better manage and grow your business — all while reducing costs.

FEATURES & BENEFITS

CAPTURE INFORMATION ANYWHERE AT ANYTIME
Automatically capture and index documents and data located anywhere in your enterprise with greater speed and accuracy.

MANAGE LARGE VOLUMES OF INFORMATION
Access documents from any location in the enterprise without the need for a centralized repository. You can manage large volumes of content and create rules to automate document assembly, distribution and retention.

SEARCH AND SHARE
Simplify access to content enabling users to quickly and easily locate the information they need to complete tasks, collaborate with contractors, vendors and coworkers and provide excellent customer service.

LEVERAGE YOUR DATA
Employs the best relational database management technology for fast and flexible indexing, data storage and retrieval to give your organization the flexibility it needs to leverage both structured and unstructured data.

CONNECT APPLICATIONS
Provides the tools needed to retrieve or share documents from any business application or repository in the enterprise. The system's API Library is ideal for sharing content and data with other web applications.

MAKE INFORMED DECISIONS
Turn your content and processes into the meaningful information needed to make informed decisions. Powerful analytics provide operational and business insights with visualization and dashboards for monitoring and performance management.

SIMPLE, FAST, EASY
Capture, search and retrieve any type of content, at any time, from any source

ENHANCED EFFICIENCY
Boost your organization's productivity and ability to make informed decisions

FLEXIBILITY OF THE SMRTR CMS PLATFORM
Provide critical business applications with new capabilities

OPTIMIZE YOUR PROCESSES AND SAVE MONEY
Continually evaluate and improve your processes to help reduce operational time and save money
