

Automate your Food Safety Compliance Management

SMRTR COMPLIANCE™

An affordable solution that drives down the expense of acquiring, managing and materializing documentation required for your organization to get and stay in compliance with FSMA.

Why manage individual document requirements when you can instead, manage the process associated with Food Safety Compliance? There are over 100 possible documents your organization may need to do business with a supplier. Documentation ranges from supplier agreements, certificates of insurance, and everything required in the event of a food safety recall or audit. SMRTR Compliance meets the needs of companies like yours in the food and beverage industry.

Let SMRTR help you mitigate your risk by collecting supplier, facility, product item and transactional information to fulfill your regulatory and business needs.

SMRTR starts by automating the process of on-boarding your suppliers and their products. Suppliers are notified to complete an interview process and asked to contribute documentation through a portal which uses intelligent automation to route documents for approval or exception handling. Notification and analytics keep your organization in compliance. Let us help you automate your FSMA process, mitigate risk and provide a distinct competitive advantage.

KEY CAPABILITIES

- Automate supplier and product on-boarding
- Automate notifications and reminders
- Contribute information via a self-service portal
- Validate and approve supplier submissions
- Centralize management of supplier information
- Provide traceability at a transaction level
- View compliance status through a dashboard
- Get and stay in compliance easily

HOW IT WORKS

On-boarding Suppliers

Automatically on-board suppliers and their products. Intelligent automation derives required documentation based upon a given profile and rules.

Information & Attachments

An interview is used to determine requirements based upon the organization, facilities, products and transactions.

Accessible & Searchable

Web-based with access from any browser or mobile device. Supplier profile information and documentation is searchable to ensure quick access in the event of a product recall, audit or inquiry.

Notification

Notifies and reminds suppliers of required documentation with instructions for uploading. Approvers are notified to review documents.

Workflow

Intelligent automation routes documents to the correct department and personnel for approval and exception handling.

Dashboard

Email links take you directly to items that require your action. Individuals can access their dashboard to track compliance and approval status and assess how their organization and that of their supplier are complying; providing visibility and traceability into your supply chain.

EASY TO USE

Upload, view and monitor your compliance status.

FAST SEARCH

Keyword search with fast results.

FLEXIBLE

All file formats are supported; easily filter results.

SCALABLE

Small and large organizations can enjoy the benefits of SMRTR COMPLIANCE.

YOUR SERVER OR CLOUD

Easily install on virtually any server platform or in the cloud.
